Re-Loading a PC Hard Drive

1. Insert CD into drive. Reboot PC. Software should start automatically.
2. Click "Go" in the lower left-hand corner.
3. Click on Programs.
4. Click on Drive Image XML.
5. Welcome screen will come up.
6. Click "Restore".
7. Choose "Disc0#2"- If there is no Disk0#2 Call TdS
8. Click "Next" in the lower right hand corner.
9. Click on gadget that looks like a folder. Click to highlight "Drive_C.xml".
10. Click open.
11. Once the file name appears in the box, click next.
12. Partition 0#2 should be highlighted.
13. Confirm overwrite red warning comes up.
14. Type Disk0#2 in field and click ok.
15. Restore in progress box will come up. The restore should take about 10 to 15 minutes.
16. Click finish.
17. Click "Go". Remove DVD and choose shutdown your PC. If you don't remove the disc before restarting your PC, it will lock up.
18. Your printer drivers will need to be re-installed. You also need to rename your PC. Call John Miller if you have questions/problems with these last steps.
