WatchGuard Edge Customize WebBlocker

You can block some web sites that WebBlocker allows by default. Use the Denied Sites feature to add the web site's IP address or domain name to WebBlocker to make sure your Patrons cannot look at this web site.

1. With your Web browser, go to the System Status page by typing the IP address of the SOHO 6, <https://192.168.1.1/> into the address field of Internet Explorer.
2. Log in (you will have been given a user name and password)

3. From the navigation bar on the left side, select **WebBlocker > Denied Sites**

4. The WebBlocker Denied Sites page appears.

WebBlocker
Denied Sites

Denied Sites 64.12.10.127

Remove

Host IP Address 64.12.10.127 Add

Submit Reset

5. From the drop-down list, select host IP address or domain name
6. Type the host IP address or domain name of the denied web site
7. Repeat step 3 for each additional host, IP address, or domain name you wish to add to the Denied Sites list
8. To add a domain name, type the URL pattern without the leading "http://". For example, to prevent access to the Playboy web site, select add a domain name and enter "playboy.com".
9. If the site has a subdomain that resolves to a different IP address, you must enter that subdomain to deny it. For example, if "www.site.com" and "site.com" are on different servers, you must add both entries.
10. Click **Add**
11. The site is then added to the Denied Sites list
12. Click **Submit**

To *remove* an item from the Denied Sites list, select the address and click **Remove** then click **Submit**
