Instructions for Kindle E-reader With Wireless Access

You first need to have an Amazon account, and register your Kindle with Amazon. You'll also need to know your library card number and password.

1. From a PC or laptop, go to the TdS Overdrive e-media website: <http://tds.lib.overdrive.com>
2. Click **Log In** found in the upper right hand corner of the screen, and enter your library barcode and password.
3. Search or browse for an e-book title you wish to read. Make sure the Kindle Book format is an option. If it is, click the **Place in Cart** link.
4. Click **Proceed to Checkout**.
5. Click **Confirm Checkout**.
6. From the TdS Overdrive e-media website, click the **Get for Kindle** button. This will take you to the Amazon website, and you'll be prompted to enter your Amazon account information if you are not already logged into Amazon. If Amazon is defaulting to a different account, click the *Use a different Amazon account* link on the right side of the screen above the *Get library book* button. [NOTE: You may be prompted to login to your Amazon account again, even though you are already logged in.]
7. Make sure the "deliver to" field is set to your Kindle, and then click **Get Library Book**.
8. Next tap the **Download** button.
9. You'll get a message that says "Your Kindle will download ...the title)... next time it connects to Wi-Fi" .
10. Turn on your Kindle. Click "Menu" and select "Turn Wireless On" (if isn't already). As soon as the device connects to the wireless network, it will download the title to your device.
11. Click the "Home" to find the title and begin reading!
